FOUR NEW PROGRAMS!

**CLEAN ENERGY: BIOFUELS • CLEAN ENERGY: GEOTHERMAL POWER
CLEAN ENERGY: WIND POWER • TRANSPORTATION**

The next four programs in our Green Careers series promise to be exciting, eye-opening adventures into the real world of Green Jobs. From high atop a wind turbine to riding a bullet train to turning algae into energy, this fascinating behind the scenes look into science, technology, government and industry is an inspiring and enlightening ride for all who dream of making a difference on Planet Earth.

NEW Clean Energy - Biofuels

We visit a state-of-the-art ETHANOL PLANT in Macon, Missouri where a MAINTENANCE ELECTRICIAN, PRODUCTION OPERATOR, QUALITY CONTROL DIRECTOR and PLANT ADMINISTRATOR oversee the conversion of corn into fuel. We also examine new technology in advanced biodiesel, produced from animal fats and from algae and waste materials. This new technology is expanding opportunities for LAB TECHS, ENGINEERS and RESEARCHERS and creating green jobs for an energy independent future from home grown renewable resources.

DVD: 33829 • VHS: 73568 • Price: \$89.95

NEW Clean Energy - Geothermal Power

We visit the largest geothermal operation in the world to see how heat from the earth's core is transformed into electricity. We meet a CHEMIST, GEOLOGIST, PLANT OPERATOR, ENVIRONMENTAL MANAGER and ENGINEER as they show us how they manage steam production wells and electric generators. This growing field relies not just on professionals with advanced degrees but entry-level workers who drill the wells and maintain the power plants in this vanguard of clean energy.

DVD: 33827 • VHS: 73566 • Price: \$89.95

NEW Clean Energy - Wind Power

From the Great Plains to the ocean shore and out at sea, the race is on to make the United States the world's number one producer of wind power. We explore a new wind ranch to see the full range of new jobs from entry-level WIND TURBINE TECHNICIAN to CRANE OPERATOR, WIND POWER COMPUTER ANALYST and up to OPERATIONS MANAGER. We also visit a leading university taking part in the California Wind Energy Initiative where young wind power researchers are beginning their new careers designing better windmills and the wind energy systems of the future.

DVD: 33828 • VHS: 73567 • Price: \$89.95

NEW Transportation

We visit Toyota Motors where AUTOMOTIVE DESIGNERS, ENGINEERS and MANAGERS are teaming up to create the cleaner, more efficient cars of tomorrow. We then follow the new breed of CONSTRUCTION INSPECTOR who makes sure today's highway construction meets new environmental standards. Lastly, we examine the plans from HIGH SPEED RAIL CONSULTANTS, PLANNERS and URBAN DESIGNERS who are using the newest information technology to reconfigure America's future transportation corridors and the urban centers they'll connect. GREEN TRANSPORTATION will be a new pathway to jobs in construction, design, engineering, finance, and management.

DVD: 33830 • VHS: 73569 • Price: \$89.95

Building Green

This program presents an overview of job opportunities in this booming industry where there is a high demand for trained professionals, designers, and workers to help improve the efficiency of commercial and residential buildings through better design of new buildings and smart improvements to existing structures. A job in a "green" construction trade can enable a young person, with a minimal amount of training, to get a foot in the door of the green economy.

Jobs profiled in this program include:

Solar Installer, Lighting Technician, Energy Auditor. Also interviewed are Stephanie Stone and Dr. Frank Alameda of the California Academy of Sciences who discuss some of the key innovations in green buildings developed by architects and engineers.

20 Minutes • DVD: 33755 • VHS: 73548 • Price: \$89.95

Clean Energy - Solar Power

In this program, we'll view the entire range of jobs needed to make solar power a reality from research and development, design and marketing, and financial analysis to construction and project management. Engineers, analysts and managers share with us both how they work in this emerging green industry and how they found the opportunity to be part of the clean energy solution.

Jobs profiled in this program include:

Research & Development Engineer, Design Engineer, Marketing Manager, Financial Analyst, Construction Manager, and Project Manager.

20 minutes • DVD: 33760 • VHS: 73553 • Price: \$89.95

Environmental Justice

In this program, we'll examine how staffers at nonprofit agencies work with lawyers, lobbyists and other concerned citizens to advocate for environmental protection and strategies for sustainable growth.

Jobs profiled in this program include:

Environmental Attorney, Research Associate, Press Secretary, Community Organizer, and EPA Attorney.

21 Minutes • DVD: 33761 • VHS: 73554 • Price: \$89.95

Green Design

In this program, we'll explore the exciting race underway to design greener products of all sorts. You can work toward a green career as an architect, interior designer, industrial engineer, or product designer within a myriad of businesses. This is a contest that will reward those who can envision or help create the "greener mousetraps" of tomorrow.

Jobs profiled in this program include:

Architect, Interior Designer, Consultant, and Landscape Designer.

21 Minutes • DVD: 33762 • VHS: 73555 • Price: \$89.95

Recycling

This program introduces job opportunities in recycling including a profile of an electronics recycling start-up and a San Francisco municipal program to recycle cooking oil into biodiesel fuel. Job opportunities in recycling include collection, transportation, receiving and sorting, disassembly, handling hazardous materials, scheduling, operations, and plant management. Recycling provides opportunities for young people to start with a temporary or part-time job, then move up to supervisory and management responsibilities.

Jobs profiled in this program include:

E-Waste Entrepreneur, Plant Manager, Biofuel Coordinator, and Truck Driver.

22 minutes • DVD: 33756 • VHS: 73549 • Price: \$89.95

Restoring the Land: Hazardous Waste Management

In this program, we'll visit a Naval Air Station where a team from the Environmental Protection Agency manages a massive program to remove a half-century of hazardous waste, and will profile such jobs as hazardous-waste technician, chemist, toxicologist, and EPA project manager.

Jobs profiled in this program include:

Project Manager, Technical Manager, Safety Officer, Chemists and Scientists.

22 minutes • DVD: 33759 • VHS: 73552 • Price: \$89.95

Sustainable Agriculture

This program provides an inside look at an organic farm and an organic retail store and discusses the day-to-day challenges and rewards of working in this field. Organic farming includes a wide range of jobs in production, marketing and distribution.

Jobs profiled in this program include:

Farm Manager, Retail Sales Manager, and Organic Produce Buyer.

22 Minutes • DVD: 33757 • VHS: 73550 • Price: \$89.95

Water Management

This program presents an overview of job opportunities in water management such as flood control, reservoir management, levee design and repair, designing and operating dams and sewer systems, river management and restoration, monitoring fish populations, protecting habitats and endangered species, maintaining natural resources, water conservation, irrigation, landscape design, and more.

Jobs profiled in this program include:

Civil Engineer, Water Resource Manager, Water Conservation Specialist, and Landscaper.

20 Minutes • DVD: 33758 • VHS: 73551 • Price: \$89.95
